

## 10 Books A Home

### Abridged Summary of April 2015 Parent Conference (aka, PCIs)

**Prompt: What have you seen that helps you know the program is working for your child?**

#### ENGLISH-LANGUAGE-SPECIFIC RESPONSES

20 responses = 27% of all PCIs

27% of parents contacted in April 2015 responded to this open-ended prompt by specifically naming English Language improvements (i.e., 20 parents out of 75). For these parents who are focused on their child's English language use –

10BH is having a remarkable impact on Learner's Kindergarten readiness skills:

**80% explicitly stated that they had seen a lot of growth in their child**

10BH is having a strong influence on Learners' orientation toward and skill in English language use:

**75% reported increases in English Language production**

**50% identified growth in their child's English language comprehension**

**25% reported that their child is now conversational in English despite starting the program with no prior English, or only limited English**

**30% reported that their child has a new passion or motivation for speaking English**

10BH is also having a strong influence on Learners' dispositions – identifying without prompting a bedrock set of foundational skills necessary for school success:

**50% of these parents who focused on English language use (10 out of 20) reported their child's increased personal confidence, persistence, engagement in learning or motivation to learn.**

#### ALL RESPONSES

60 responses = 80% of all PCIs

80% of parents contacted in April 2015 responded to the open-ended prompt (i.e. 60 out of 75). For this larger sample of parents –

10BH is having considerable impact on Learners' Kindergarten readiness skills:

**63% explicitly characterized that they had seen a lot of growth in their child**

**47% identified increases in knowledge of preschool topics (ABCs, Numbers, Colors, & Shapes), with almost all naming growth in 2 or more topics**

**23% reported that their child's interest or ability in reading has grown**

**12% reported growth in their child's ability to write**

**22% reported that their child is communicating more now, without specifying which language**

10BH is having an impact on their child's disposition for learning:

**42% (25 out of 60) specifically identified their child's engagement in learning or motivation to learn**

10BH is having an impact on their child's ability to direct their own learning:

**18% addressed gains in their child's ability to advocate for their own interests, to express their interests and wishes, and to regulate their actions**
